

# MAXIMUM

## INDUSTRIES, INC.

AS9100 &  
ISO 9001:2008  
CERTIFIED

## Large Work Envelope Machining

### CNC Milling & Turning

We meet client needs, from very small parts using high speed spindles, through large and heavy parts requiring 50 taper tooling.

- A large family of verticals and horizontals up to 70" x 165" x 35"
- Mill-turn up to 28" diameter x 89" long
- Rotaries, right angle heads, vacuum tables, etc. for high production

### Waterjets & Lasers

Six waterjets including large work envelope 5-axis systems, integrated with the largest 90,000 psi pump in the country, allow us to cut faster or thicker than any other source.

Multiple lasers up to 5000 watts provide the flexibility to process certain materials more accurately and faster.

**Learn more from our YouTube video,  
then contact us to get started.**

Whether it's traditional machining, non-traditional waterjets and lasers... or a combination, let Maximum Industries review your application to determine the process which results in the highest quality part at the least cost.

- Climate-controlled facility
- Close tolerances
- Advanced QA department includes Faro Arm, Laser QC, CMM, Optical Comparator, etc.
- Woman Owned Small Business
